YUKON

STATISTICAL

PROFILE

This report was funded through the Northern Oil and
Gas Action Program (NOGAP) of the Federal Government

FOREWORD

The **Statistical Profile** is a comprehensive reference document on the Yukon's geography, population, economics, and government. It assembles statistical data not currently available or easily accessible.

Neither the **Statistical Profile** nor the data which comprise it are static. The **Profile** will expand and improve over time, building on its beginning as a baseline data source. Changes will occur in at least three ways.

First, while researching and collecting data on the Yukon for this publication, the Bureau discovered areas where primary data were not available. This need is now being addressed. Second, we are working to improve both the range and the quality of secondary data which are available from public and private sources. Finally, the **Profile** makes data available to users both from the printed document and, to a limited extent, on machine-readable media.

The **Profile** has served as a focus for gathering relevant data on the Yukon. Further, it has provided a good review and evaluation of Yukon data which are or will be available from the Bureau of Statistics. It will reduce the demand made on Bureau personnel to repeatedly research routine requests for information.

Since it is our intent to update and expand the **Profile** both as the statistical character of the Yukon changes and in response to the feedback we receive from **Profile** users, your comments and suggestions for additions or improvements to this publication are welcome and encouraged.

Bureau of Statistics
Executive Council Office
The Yukon Government

Development and production of the **Statistical Profile** was supported by funding from the Northern Oil and Gas Action Program (NOGAP) of the Federal Government of Canada.

SYMBOLS & ABBREVIATIONS

..	figures not available
...	figures not appropriate/applicable
-	nil or zero
--	amount too small to be expressed
(e)	estimated figures
(f)	first estimates
(p)	preliminary figures
(r)	revised figures
(x)	amount withheld due to confidentiality
(T)	total
(M)	male
(F)	female
(A)	airport
(no)	number
(avg)	average
(%)	percent
(000 000)	millions
(000)	thousands
($)	dollars
Quarter I	January 1 to March 31
Quarter II	April 1 to June 30
Quarter III	July 1 to September 30
Quarter IV	October 1 to December 31
(MW.h)	megawatt hour
(km)	kilometre
(c)	degrees celsius
(000L)	thousands of litres
(m^3)	cubic metres
(m^2)	square metres
(m)	metres
(cm)	centimetres
(mm)	millimetres
(t)	metric tonne
(kg)	kilogram
(g)	gram

CHAPTER 12

FORESTRY, AGRICULTURE & LIVESTOCK

FORESTRY, AGRICULTURE & LIVESTOCK

Tables:

12.1 AREAL EXTENT AND LOCATION OF AGRICULTURAL CAPABILITY CLASSES, (1984)

12.2 APPROXIMATE ACREAGES OF AGRICULTURAL LAND APPLICATION, by Region and Class, Yukon (1984)

12.3 QUALITY OF YUKON GROWN FORAGE, Compared with Alberta (1984)

12.4 PRESENT AND PROJECTED LIVESTOCK NUMBERS (1984)

12.5 LAND USE and BURNING PERMITS, Yukon (1976 - 1985)

12.6 TIMBER PERMITS, by Type, Yukon (1971 - 1985)

12.7 FOREST FIRES, by Number and Area Burned in Hectares, Yukon, Canada and Provinces (1975 - 1984)

12.8 PRIMARY FOREST PRODUCTION, Yukon (1971 - 1986)

12.1 AREAL EXTENT AND LOCATION OF AGRICULTURAL CAPABILITY CLASSES,(1984)

	Class 3 and 4	Class 5	Total
		(acres)	
Dawson-Stewart Mayo	60,200	412,300	472,500
Pelly Crossing Carmacks	68,500	355,000	423,500
Watson Lake	25,800	516,900	542,700
Faro-Ross River	1,600	78,800	80,400
Whitehorse	...	180,900	180,900
Takhini-Dezadeash	...	311,800	311,800
Totals	156,100	1,855,700	2,011,800

Source: Yukon Agriculture Report

Notes: The totals are rounded and therefore should not be regarded as absolute totals for Yukon

Class 3 and 4 land requires moderately intensive management practices or supports moderately restricted range of crops

Class 5 land supports perennial forage crops or other specially adapted crops but is not suitable for cereals

12.2 APPROXIMATE ACREAGES OF AGRICULTURAL LAND APPLICATION, by Region and Class, Yukon (1984)

	Land Applications			To be in Production in next 5 years	
	Number of Applicants	Total Acres	Class 3,4 Land (As % of Total)	Class 3 & 4	Class 5
Dawson-Stewart Mayo	31	6,300	51.2	921	560
Pelly Crossing Carmacks	11	5,810	52.7	549	268
Watson Lake	4	3,100	12.6	84	184
Faro-Ross River	2	350	45.7	84	84
Whitehorse	61	51,350	...	...	4,058
Takhini-Dezadeash	40	17,750	...	...	3,379
Totals	149	48,610	14	2,393	8,533

Source: Yukon Agriculture Report

Notes: The totals are rounded and therefore should not be regarded as absolute totals for Yukon

Class 3 and 4 land requires moderately intensive management practices or supports moderately restricted range of crops

Class 5 land supports perennial forage crops or other specially adapted crops but is not suitable for cereals

12.3 QUALITY OF YUKON GROWN FORAGE, Compared with Alberta (1984)

	Average Protein(%)	Average Fibre (%)
Brome		
Alberta Average	8.8	33.5
Watson Lake	11.6	35.0
Dawson-Mayo	11.5	31.8
Whitehorse	7.3	27.5
Alfalfa		
Alberta Average	16.1	31.4
Whitehorse	9.5	31.2
Whitehorse (Oats)	5.8	..

Source: Statistics Canada # 85X201E # 85-522E

Notes: 1983 totals include charges against juveniles of unkown age
Number of charges adjudicated per 1,000 juveniles
Rates for Canada are based only on the total population falling within the age jurisdiction of the juvenile courts and not on the national totals population in the age group. ie. the national rate for 12 yrs olds, excludes the population of 12 years old in Quebec
The overall rate is the total charge count shown divided by the population estimate (in thousands) of persons in the age jurisdiction of the juvenile court in each jurisdiction. Age groups excluded from the jurisdiction indicated with "..."

GLOSSARY

Much developmental work is needed before a set of definitions that is both complete and workable can be applied to all jurisdictions. For this reason, the reader is advised to pay special attention to explanatory notes accompanying data presentations for each jurisdiction. Generally, the following definitions apply to the data elements contained in this publication, unless otherwise specified.

Admission to Custody. A person can be admitted to a correctional facility in any of the following ways:
- under a warrant of committal to serve a sentence;
- under a remand warrant to await further court appearance;
- for purposes of temporary detainment prior to an appearance in court;
- through revocation of a conditional release such as parole or mandatory supervision;
- under transfer from another country;
- under transfer from a provincial to federal institution and vice versa;
- under other written authority committing a person to custody.

Not all correctional facilities admit persons to custody for all of the above reasons. For example, some facilities are used exclusively for sentenced offenders and do not admit persons awaiting trial or sentence.

Annual admission data do not represent an unduplicated count of individuals as it is possible to be admitted, released, and re-admitted to custody during the same year. Transfers between jurisdictions are counted as new admissions in both the transferring and receiving facility. This causes another source of duplication when compiling national admission data. Transfers to private or government facilities within each jurisdiction are excluded from admission data as are transfers to camps or other affiliates to base facilities.

Note that the location of incarceration rather than the location of residence is the universe surveyed, unless otherwise specified on the table.

Sentenced Admission. When an accused is found by trial to be guilty of an offence, a court disposition is handed down by the presiding judge or magistrate specifying the manner in which the accused is to be dealt with. One such disposition requires that the accused, under a warrant of committal, be admitted to custody. Sentenced admissions then, refer to the number of persons in custody under a warrant of committal. They include those who have been sentenced on one or more charges but who are awaiting the completion of court hearings on other charges.

As well, persons who have completed a custodial sentence and are returned to custody following the breach of agreements pursuant to a conditional discharge are counted as new sentenced admissions. Federal offenders admitted under sentence to a provincial facility are included as a provincial admission even though they are awaiting transfer to a federal facility.

Inmates sentenced to custody prior to the year under study are not carried over from year to year. However, inmates admitted under lock-up or remand status in the previous year and sentenced during the reporting period are included. Total sentenced admissions refer to all inmates admitted to custody under sentence during the reporting period, regardless of initial status on admission to custody.

Non-sentenced Admission. Includes all offenders admitted to custody during the year under study who did not receive a custodial sentence. That is inmates admitted under remand or lock-up status and subsequently sentenced are counted as sentenced rather than non-sentenced admissions. This category also includes inmates held temporarily for other reasons (e.g., mental health).

Lock-up Status. Refers to all persons in custody who are neither sentenced nor remanded. This includes persons detained for short periods of time under the authority of provincial/territorial statutes.

Remand Status. Refers to those persons in custody who are awaiting a further court appearance and who are not presently serving a sentence.

Admission to Community Supervision. All admissions to probation and parole/mandatory supervision during the year are included, regardless of the degree of supervision or the supervising agent, i.e., volunteer, contractor. Excluded are those temporarily released from custody, e.g., temporary absences, day paroles. Cases carried over from the previous year are also excluded.

Provincial/ Territorial parole/probation admissions are listed by the location in which supervision is give, while federal parole and mandatory supervision releases are listed by the location of the releasing institution.

Probation admission. Refers to the number of individuals whose probation order(s) commenced during the year under study. As such, probation admissions do represent an unduplicated count of individuals.

Provincial Parole Admission. Refers to the number of paroles granted during the year.

Federal Parole and Mandatory Supervision Admission. Refers to the number of releases to parole and mandatory supervision status.

Adult Population. Refers to the number of persons in the standing population, who are held legally responsible for their actions. Prior to April 1, 1985, individual provincial/territorial governments had the authority to change the upper age limit to either 17 or 18 years (the age at which an individual was considered an adult for the purposes of the criminal law). For historical comparisons, the following show the lower adult age limit for each jurisdiction:

16 years and over - Prince Edward Island,
Nova Scotia,
New Brunswick, Ontario,
Saskatchewan, Alberta,
Yukon and Northwest Territories;

17 years and over - Newfoundland and Labrador,
British Columbia;

18 years and over - Quebec and Manitoba.

Following the implementation of the **maximum uniform age** provision of the Young Offenders Act in April 1985, a youth is now defined as anyone aged 12 to 17 inclusive.

Therefore, the adult population is uniformly defined as all persons 18 years and over.

Age. Refers to age on admission of offenders sentenced to custody or probation, as well as inmates released to federal parole/mandatory supervision. Due to the lack of consistent age categorization across jurisdictions a measure of the most common age was estimated, for comparative purposes, by calculating the median age for the provincial systems using the standard formula for grouped data, a mean age for the federal system using the standard arithmetic mean formula. The median, or the positional mean, was viewed the most appropriate measure of central tendency for three reasons: it is less influenced by extreme values; it can be calculated for open-ended distributions; and, it can be calculated for distribution with unequivalent age categories. It is also important to note that the median age calculation was based on distributions which represent a duplicated count of individuals admitted during each year.

Athletic/Recreational Services. These services are made available to inmates as a leisure time activity and as an opportunity to develop/maintain physical fitness.

Average Count. Ideally, average counts are derived from daily midnight counts and refer to the number of inmates actually present at the time the count is taken. If daily counts are not available, the most frequent time interval used to count inmates is applied.

Inmate status (sentenced or non-sentenced) at the time of the count rather than at the time of admission is reported. The sentenced inmate count includes all inmates serving sentences as well as those serving sentences with further charges or trials pending. Non-sentenced inmates include those who are awaiting a court appearance or are held temporarily for other purposes.

Note that the average count also applies to offenders under community supervision. Parolees supervised by provincial offices are excluded from these data unless a provincial Board of Parole is in operation. These counts are based on location of office through which supervisory services are provided.

Bail Verification/Supervision. These programs are aimed at reducing the number of people remanded into custody by providing a verified profile of the accused prior to court appearance and offering bail supervision as an alternative to pre-trial custody.

Chaplaincy/Religious Services. Worship services, counselling, religious education and related activities are available through resident or visiting local chaplains.

Community-based Residence/Halfway House. Any government or privately-operated facility within the community that is designed for the rehabilitation and supervision of selected inmates, parolees or probationers. This is typically a residential facility away from a correctional institution and provides inmates with the opportunity to work, attend academic or trades training, or take part in treatment programs.

Community Service Order. A sentencing alternative/option, granted as a condition to a probation order, which requires offenders to perform community services for an individual or non-profit organization in lieu of serving time in jail. Attempts are often made to have offenders do work for the victim(s) of their criminal behaviour.

Custodial Programs/Services. Refer to specific descriptions in this glossary.

- Inmate Employment/Work Program
- Occupational/Vocational Training/Counselling
- Educational/Counselling Program
- Chaplaincy/Religious Services
- Athletic/Recreational Services
- Medical/Dental/Psychiatric/Psychological Services
- Volunteer/Outside Agency Services.

Designated Capacity. Operational capacity refers to the number of inmates the facility is designed to hold under regular circumstances. Capacity designated as **special** is for special purpose usage such as sickness, discipline, protective custody, or segregation. If a distinction between **operational** and **special** is not available, total capacity only is reported.

Note that standards used to assign capacity figures vary across jurisdictions, and that the use of bed-space for special or normal purposes is flexible, depending on operational need. Also note that capacity figures may vary over the course of the year through the restructuring of available bed-space. In most cases, capacity at year-end is reported.

Day Parole Decisions. Federal or provincial parole boards can make five types of decisions for inmates on day parole:

Revocation - Due to a breach of a condition of release or evidence that the inmate has re-offended, the inmate is returned to custody;

Suspension
Canacelled - The decision by a parole officer to suspend day cancelled parole is reviewed and cancelled;

Termination - The inmate is returned to custody because the day parole program has ended through no fault of his/her own (e.g., treatment program cancelled);

Modified - Terms or conditions of day parole reviewed and altered;

Continued - Continuation of day parole that was granted previously and due to expire.

Drinking/Driving Program. A court referral program for the purpose of reducing the incidence of impaired driving offences through education. Participation in the course may be used as a condition of probation, or in addition to a fine or imprisonment, or prohibition from driving.

Educational/Counselling Program. Allows the inmate to continue or upgrade his/her education within the institution, at outside educational facilities or through correspondence courses. Academic placements depend upon the inmate's mental ability, educational record, and degree of interest.

In addition, life skills courses aim to develop skills and attitudes for successful daily functioning with an emphasis on employment. Specific counselling treatment programs such as drug/alcohol education and native counselling are also available.

Escapes. There are two type of escapes. The first occurs **without** a breach of security, when an inmate walks away from a minimum security facility, or fails to return from a temporary absence or fails to appear to serve an intermittent sentence. The second occurs **with** a breach of security, when an inmate breaks an internal or external security barrier.

Expenditures. Refers to actual expenditures on adult correctional services only. Monies for indirect correctional costs which are expended by departments external to corrections are generally excluded. Expenditures are expressed in both current and constant dollars in order to provide a better indication of historical data.

Constant Dollars. These historical figures have been expressed in constant 1985-86 dollars to account for inflation. The deflationary index chosen is the **Gross Domestic Product (expenditure based) at 1981 Prices**. This index reflects inflationary cost in government spending for correctional services.

Headquarters and Central Services. This general category refers to dollars expended on Headquarters and Central Services, Regional and District Offices. These expenditures relate to the administration of correctional services within a jurisdiction.

Per Capita Cost. Represents expenditures divided by the total population, expressed as $/per capita, for the jurisdiction in question.

Contracted Services. Refers to all agencies operated by employees from the private sector under a contracted agreement with the provincial or federal government or both governments combined.

Contracted supervision relates to expenditures in the form of contracts to private agencies to supervise offenders (i.e. parolees or probationers) in the community.

Institutional Operating Cost. Refers to costs associated with operating a government operated facility over each year. Included are internal administrative costs, salaries, benefits, maintenance, food, clothing, etc. Excluded are capital expenditures.

Total Days Stays. Refers to the estimated number of prisoner days served in one year, usually based on overnight stays. Calculated by either adding the daily midnight counts for an entire year when data are available or by multiplying the average daily count by the number of days in the particular year.

Average Daily Inmate Cost. Refers to an estimated average amount expended daily on each inmate housed in a government operated facility. This rate is calculated by dividing total operating expenditures by total days stay. Note that average costs do not reflect marginal costs. That is, due to some costs which are fixed, the admission of an additional inmate to a facility does not add the full average daily cost to the daily expenditures of the facility.

Other Services/Grants/Contributions in Custody Centres. This category reports expenditures in the form of contacts, grants or contributions to private agencies that deal specifically with inmates housed in government or privately-operated facilities. These agencies provide a number of services such as education, counselling, information, etc. to inmates.

Other Services/Grants/Contributions for Community Supervision. This category reports expenditures in the form of contracts, grants or contributions to private agencies that deal specifically with parolees or probationers. These agencies provide a number of services: education, counselling, information, etc. to offenders in the community but do not provide supervision of those offenders.

Fine Option Program. Program which allows offenders to work in lieu of payment for fines; it is offered to offenders who are convicted of an offence, fined and given time to pay, as well as inmates incarcerated solely for defaulting on fines.

Government Facilities. Refers to all custodial facilities run by the government agency responsible for corrections in each jurisdiction. These facilities are distinguishable from private correctional facilities in that they are operated by government employees rather than employees from the private sector. If a facility has affiliates or satellites (e.g., work camps) which are administered centrally, the data includes the operations of the affiliates.

Many terms are used among the jurisdictions when referring to custodial facilities. Some examples are: jails, correctional institutions, community correctional centres, community residential centres, detention centre, reformatories, training centres, remand centres, and camps. The meaning of each of these terms varies across jurisdictions.

In addition to holding sentenced offenders for up to two years less a day, provincial government correctional facilities may house persons held for remand or lock-up purposes as well as persons awaiting transfer to another penal institution or awaiting deportation. Facilities used for temporary lock-up purposes exclusively are not within the scope of this report. Penitentiaries are also considered government correctional facilities. They are federal penal institutions housing persons sentenced to imprisonment for a period of two years or more.

It should be noted that persons sentenced with a provincial term of less than two years may serve their sentence in a penitentiary by special agreement between the jurisdictions involved. The reverse is also true of persons who receive a federal sentence of two years or more.

Secure Facilities. Facilities are considered secure when inmates are detained by security devices, including those which operate with full perimeter security features and/or those where inmates are under constant supervision or observation.

Open Facilities. A facility classified as open denotes the minimal use of security devices or perimeter security and/or where supervision of inmates is only partial. Camps or work farms, usually for sentenced offenders, are examples of open facilities.

Community Correctional Centre. Any government-operated facility, designated by the department responsible for correctional services, for the rehabilitation and supervision of partially-released inmates. This is typically a residential facility where the inmate may work, attend academic or trades training programs, take part in treatment programs.

Inmate Deaths. Refers to all inmate deaths which occurred both within the confines of a correctional facility as well as those offenders who were on the institutional registers but were not in custody at the time of death.

Inmate Employment/Work Program. Provides inmates with an opportunity to develop positive work habits/skills in various work settings both within the institution and outside the institution. Intra-institutional jobs include duties in the kitchen, laundry, tailor shops, tree nursery, maintenance and gardens. In the community, jobs involve construction of fences, bridges, overpasses, land clearing, landscaping and volunteer work for senior citizens, community hospitals, and mental health centres. Selection of inmates is based on skill, attitude, treatment plan, security needs, and the availability of appropriate programs.

Intermittent Sentence. Refers to a sentence to custody which is to be served periodically over an extended period of time (e.g., weekends for a year).

Major Offences. Refers to the offence for which the inmate was convicted and sentenced. If convicted of more than one offence, the major offence is the one for which the longest single sentence of incarceration was imposed by the court. If more than one offence was given for this same sentence, the major offence is the most serious one, as measured by the maximum penalty allowed by law. If more than one offence carries the same maximum penalty, the major offence is the first of those listed on the warrant of committal.

In some jurisdictions, the unit of count is based on multiple charges rather than most serious offence. Deviations are footnoted on the data tables.

Mandatory Supervision. Mandatory supervision allows a federal inmate to be released from a penitentiary prior to the warrant expiry date because of accrued earned or statutory remission exceeding 60 days. Supervision commences upon release and continues for the duration of the remission period, that is , until the warrant expiry date. If the terms of the mandatory supervision agreement are violated, the person may be returned to the institution from which he was released.

Medical/Dental/Psychiatric/Psychological Services. Limited health care services are generally available in the institution through resident nurses, psychologists, local doctors, and dentists. Where more intensive treatment is necessary (e.g., psychiatric, alcoholic) individuals are transferred to specialized hospitals or treatment centres.

Native. Refers to all North American Indians, Metis, Eskimos, Inuit; treaty and non-treaty, status and non-status. In general, this is based on the inmate's self-report.

Non-custodial Programs/Services - Refer to specific descriptions in this glossary.

- Probation
- Parole
- Mandatory Supervision
- Temporary Absence Program
- Community Service Order
- Restitution Program
- Fine option Program
- Victim-offender Reconciliation
- Victim-witness Program
- Drinking/Driving Program
- Bail Verification/Supervision
- Volunteer Outside Agency Services
- Community-based/Halfway house Program.

Occupational/Vocational Training Programs. Provides inmates with an opportunity to exercise interests and abilities and develop marketable skills through job training in areas such as motor mechanics, auto-body repair, carpentry, upholstery, and welding, either in the institution or at community schools or colleges. Selection depends on the inmate's physical condition, mental aptitudes, past work history, occupational interest, needs, and opportunities upon release.

Parole. A form of conditional release from custody whereby an inmate who is considered eligible may be released, at a time considered appropriate by a parole board, to serve the balance of a sentence in the community, subject to supervision and stated conditions. Most inmates are not eligible for parole until one-third of their sentence has been served. Prior to being granted full parole, and inmate may be released on day parole for rehabilitation purposes (e.g., to receive training or education not normally offered within the institution). While on day parole the inmate must return daily to the institution or a correctional residence in the community.

Probation. Refers to a type of court disposition which is served in the community under conditions of supervision. A probation order may be given in conjunction with a suspended sentence, conditional discharge, fine or jail sentence.

Probation/Parole Office. Refers to facilities operated by the government agency responsible for the delivery of adult community supervisory services and staffed by government employees.

Rates. A rate expresses a number in terms of its size in proportion to another number, for example, the number of prisoners in Canada per 10,000 population. Although not always true, rates are often expressed as a proportion of the potential population for which an observed characteristic could be true. Accordingly, rates in this report mostly pertain to **adults** incarcerated in government-operated correctional facilities.

When total provincial rates have been calculated, the standing populations of provinces for which no data were available have been excluded.

Note that a percentage distribution is a type of rate, that is, rate per 100 total. A percentage is useful in displaying the relative size of each component part to the aggregate total. An example would be the age distribution of adults admitted to custody.

Reason for Admission. Both drinking/driving and fine default categories are mutually exclusive and refer more to cause of incarceration rather than offence committed.

File Default. As selected category of sentenced admissions this term refers to the number of persons admitted to custody who, if their original sentence of fine payment had been satisfied, would not be in custody.

Drinking/driving. As a selected category of sentenced admissions this term refers to the number of persons admitted to custody whose most serious offence was either: a)impaired driving, b) blood/alcohol over .08, or c) refusing a breathalyzer (Sections 234-237 or the Criminal Code).

Restitution Program. Program available to the inmate and to those under probation supervision whereby the offender agrees to partially or fully pay the victim of his crime for any damages.

Security Level. Provincial and territorial correctional facilities are classified as secure or open. A facility is considered secure when inmates are detained by security devices, including those which operate with full perimeter security features and/or whose inmates are under constant supervision or observation. A facility classified as open makes the minimal use of security devices and only partial supervision of inmates. Work camps and community-based correctional facilities are often considered to have an open security level. If the security level of an affiliated facility differs from that of the base facility, the security level of the base facility is assumed.

The classification of security levels in federal institutions ranges from S1 to S7, and ML (multilevel).

Sentence Length. Refers to a calculation in days, months, or years of the total time to be served in a correctional facility or under community supervision. For multiple sentences this is the sum of the consecutive sentences. If these sentences are served concurrently, the longest sentence is the aggregate. The length of an institutional sentence is not necessarily equivalent to time served. The effect of conditional release such as parole is that a lesser amount of time is actually served in an institution. In the case of a revocation of conditional release, the amount of time to be served is the remnant of the aggregate if a new offence has not been committed.

The sentence length categorization was standardized across jurisdictions by linear interpolation before using the standard formula to calculate the median sentence length in each jurisdiction. For further explanation see **Age**.

Temporary Absence Program. A conditional release of sentenced inmates with or without an escort for medical, humanitarian, or rehabilitative purposes. It can vary from a few days to several months and is dependent on a satisfactory community assessment, availability of an adequate release plan and the good conduct of the inmate. This program is used to facilitate the successful reintegration of offenders into the community by using community programs and services as well as maintaining family/community contacts and responsibilities. Policies and procedures governing its operation vary significantly among jurisdictions.

Time Served. Refers to the total length of time, measured in days, months or years, served as of an inmate's release from a correctional facility. All releases except transfers are included.

Victim-offender Reconciliation. Programs whereby the offender is required to meet with the victim and, with the assistance of a mediator, come to an agreement to correct the harm done in a manner satisfactory to both parties.

Victim-witness Program. Provides services to victims including crisis counselling, and information about the criminal justice process. It is directed toward easing the burden of victims of crimes and assisting individuals in meeting their responsibilities as witnesses in court.

Volunteer/Outside Agency Services. Comprises services by private citizens, professional groups, and community organizations such as the Elizabeth Fry Society, John Howard Society, Salvation Army, Native Counselling Services, Alcohol and Drug Addiction Commissions, religious groups and Alcoholics Anonymous. Services to offenders include institutional visits, supervision under probation and parole, administration of educational/life skills programs, and other custodial and non-custodial programs and services. Some of these groups are contracted by Correctional Departments to provide specific services.

FOOTNOTES:

General Notes

(1) In both federal and provincial tables, some historical data have been revised since the release of the 1983-84 report. These changes are due in most cases to local operational system updates and edit cycles.

(2) Percentage distributions and rates may not aggregate to totals due to rounding.

(3) Percentage distributions are based on known cases only, and not necessarily on the total number of cases indicated on the table. Unknown cases include all the missing values, coding errors, not stated, and cases not know. When calculating the Canada totals, averages were applied to the total number of cases shown on the table rather than the actual number of cases used.

(4) All tables indicate fiscal year data. However, four provinces generally report on a calendar year basis: Prince Edward Island, Nova Scotia, New Brunswick until 1984-85, and Manitoba. Where this is not the case, it is noted in applicable table footnotes.

(5) Prior to the uniform maximum age provision of the Young Offenders Act (YOA) in April 1985, the lower adult age limit in each jurisdiction was used to calculate jurisdiction-specific adult population rates per 10,000.

(6) Figures expressed in constant dollars refer to 1985-86 dollars calculated using the Gross Domestic Product (expenditure based) at 1981 prices. These are the Government Current Expenditure on Goods and Services, seasonally adjusted figures. The figures were obtained from the System of National Accounts Divisions, Statistics Canada.

Table 23.2

(1) Actual offences refer to all incidents which become known to the police are subsequently substantiated (i.e. excludes all unfounded offences) by further police investigation. It should be noted that the multiple offence rule is applied by the police when reporting. This rule states that where several offences occur in one incident, only the most serious offence is scored.

Generally, traffic offences have been excluded from these data, however, Criminal Code drinking and driving offences are included, and identified separately in the total since they represent a large proportion of all admissions to provincial incarceration.

Table 23.3

(1) With the exception of Criminal Code drinking and driving offences, the number of persons charged refers only to adults. The figures under drinking and driving include a small number of youths. Traffic violations are excluded for all offence categories with the exception of Criminal Code drinking and driving.

It should be noted that the multiple offence rule is applied by the police when reporting. (see 23.2 above)

Table 23.11

(1) Capital costs have been excluded from all jurisdictions' expenditures.

(2) Employee Benefits - For five of the jurisdictions, employee benefits have been estimated as a percentage of salary costs. The jurisdictions and their respective percentages are:

Newfoundland and Labrador - 12.0%
Prince Edward Island - 5.5% (does not included provincial share or the cost of administering Provincial Pension Plan).
Nova Scotia - 12.0% (Headquarters and Community Services only)
Manitoba - 12.0%
Saskatchewan - 14.5%

These jurisdictions' totals are indicated as estimates to reflect this calculation.

(3) Nova Scotia - Transportation costs for custody centres have been excluded for 1985-86

(4) New Brunswick - Expenditures for grants to private agencies under Headquarters and central services have been distributed to both Custodial services and community supervision services, under their respective purchased services.

(5) Quebec - The historical figures for Quebec have been revised so as to remain comparable. Previous to 1982-83, approximately 20.0% was added to the total custodial service expenditures to reflect costs on services provided by le ministere des Travaux publics et approvisionnements.

(6) Ontario - 1984-85 saw major organizational changes in the Ministry of Corrections. Thus 1983-84 and 1984-85 have been re-stated to reflect the new Vote and Item structure.

Expenditures do not include recoveries for revenues generated from inmate industrial programs.

(7) Yukon - Expenditures for headquarters and central services are prorated to reflect time spent on adult corrections by staff at Justice Department.

(8) Northwest Territories - Expenditures for employee benefits are not included in 1985-86.

Table 23.12

(1) Prince Edward Island - In 1984, the five probation/parole offices included two part-time offices staffed with personnel from the full-time offices.

In 1985, there were four full-time offices, one part-time office and one satellite office located in a court house.

(2) Saskatchewan - In addition to these 12 facilities, there are 9 camps.

(3) Alberta - Six of the facilities reported to have a secure setting are multilevel facilities.

Protective custody is included in the total operational capacity count.

(4) Northwest Territories - Two of the facilities reported to have a secure setting are multilevel facilities.

The number of probation offices reported includes satellite offices that are open only when the probation officer visits outlying communities.

Table 23.13

(1) Unless otherwise specified, staffing reflects actual person-years.

(2) The percentage of total expenditures accounted for by salaries includes employee benefits.

(3) Newfoundland and Labrador - Not included in the community services count are the social workers from the Department of Social Services.

(4) Nova Scotia - Staffing figures reflect actual staff as of March 31, 1986.

Probation/parole staff complement includes 7.4 person-years representing 30 assistant probation officers on contract.

As correctional institutions in Nova Scotia are owned and operated by the municipalities, expenditures relating to salaries can not be separated due to the different accounting systems used.

(5) Quebec - Staffing figures reflect budgeted person-years.

(6) Ontario - Only classified positions have been counted. The count of correctional officers includes senior and supervisory correctional staff.

(7) Manitoba - Community supervision staff figures have been pro-rated to exclude those positions primarily responsible for youth programs.

(8) Saskatchewan - Staffing figures reflect budgeted person-years.

(9) British Columbia - All staffing figures are expressed as full-time equivalent (FTE). Thus a breakdown into specific positions (e.g., correctional officers, probation officers) is not available.

(10) Northwest Territories - Staffing figures represent actual staff as of March 31, 1986. Numbers for non-custodial services reflect the number of person years for probation officers and others. There are actually 82 social workers in the field who have varying probation case loads.

Table 23.14

(1) Total days stay is calculated by multiplying the average daily count for each jurisdiction by the number of days in the particular fiscal year.

(2) Nova Scotia - the decrease in operating the expenditures in the 1985-86, over the previous years, was due to the conversion of three adult facilities to young offender facilities during the year.

(3) New Brunswick - Includes community residential centres for both expenditures and total days stay.

(4) Saskatchewan - Total days stay and operating expenditures do not include the St. Louis Rehabilitation Centre nor the Regional Psychiatric Centre.

Table 23.15

(1) For most jurisdictions, percentages shown for earlier years are estimates.

(2) New Brunswick - All admission characteristics are based on offenders who were both admitted and released during the calendar year.

(3) Quebec - In 1981-82, age data are descriptive of the remanded and sentenced inmate admissions. Also, inmates subsequently sentenced during the year were excluded from calculations. In 1983-84, the median age for the sentenced population was calculated excluding changes of status.

(4) Manitoba - Admission characteristics by ethnicity and age do not include sentenced admissions to the Provincial Remand Centre.

Table 23.16 & 23.17

(1) The Canada total for lock-ups/other admission figures is included under Total non-sentenced admissions.

(2) Newfoundland and Labrador - In 1981 the Corrections Division assumed responsibility for the Grand Falls and Corner Brook lock-ups and in 1982 also took on the St. John's lock-ups. On December 1, 1983 the Grand Falls lock-up was transferred to RCMP jurisdiction. The 1981-1982 and 1982-83 average counts for lock-ups were estimated by assuming an average of one day stay for each admission.

(3) Prince Edward Island - Police lock-up facilities were essentially non-existent in Prince Edward Island; the police use provincial facilities for lock-up purposes. The average case load in 1982 provided the basis for estimating the previous year's figures.

Although adult facilities also house young offenders, the data represented in this table are for adults only.

(4) Nova Scotia - The municipalities own and operate all correctional facilities in the province. The Corrections Division of the Department of the Attorney General coordinates the delivery of selected adult correctional services for sentenced and remanded inmates. Lock-ups are the exclusive responsibility of the police and have been excluded from these data although lock-ups are also housed in the same facilities.

The on-register counts for 1982-83 and 1983-84 were estimated based on the proportion of inmates temporarily not in custody. Offenders admitted under remand and eventually sentenced during the year are counted under sentenced admission.

(5) New Brunswick - Average count since 1984-85 was calculated using 365 time points. In previous years, the average count was calculated using 96 different time points. Average count data for 1981-82 were estimated from known on-register counts.

Two provincially-owned jails house a small number of offenders on lock-up status from municipal police forces. In addition, since September 1985, provincial jails are also used for New Brunswick Highway Patrol Holdings. Admissions to lock-ups were estimated by assuming an average stay of one day and multiplying the average lock-up count by a factor of 365.

The average actual inmate count was not available for the first year in the time frames. The ratio of actual count (i.e. sentenced, remand and lock-ups) to on-register count in 1982-83 provided the basis for historical estimates. Cases with unknown status were proportionally distributed to the sentenced, remand and lock-up categories, an average of approximately 12 in 1982-83.

(6) Quebec - The 1983-84 and 1984-85 on-register counts were estimated based on the difference between on-register and actual counts for 1982-83.

Changes of status are included in the sentenced admission figures for 1984-85 and 1985-86.

Lock-ups and other types of non-sentenced admissions were estimated for 1983-84 by applying last year's proportion of lock-ups to total admissions.

Although the police generally provide lock-up serviced in Quebec, provincial facilities also house a small number of lock-ups on occasion, most of which are held under the Immigration Act. On average, lock-ups are held in provincial custody for one day.

Cases for which inmate status was unknown were proportionally distributed to the sentenced, remand and lock-up categories, an average of approximately nine in 1982-83.

(7) Ontario - On-register counts were not available for the first four years under study.

Remands are estimated to be 94.5% of the actual remand plus remand and sentenced count in 1985-86.

On occasion, a small number of lock-ups may be housed in provincial facilities. In 1981-82 and 1982-83 sentenced/non-sentenced breakdowns have been estimated.

Sentenced admission figures represent those sentenced during the year regardless of status on admission or actual admission date.

(8) Manitoba - Although total admissions excluding transfers is known, the breakdown between sentenced and remand is based on total admissions including transfers. Each transfer is counted as a new admission.

In 1985-86, lock-up admissions are included with the remand figures.

In 1984, an average of eight cases for which the inmate status was unknown were included in the remand count.

The 1982 distribution of the non-sentenced count (i.e. remand and lock-ups) provided the basis for estimation of the previous year's figures.

Prior to 1985, offenders admitted under remand status and subsequently sentenced during the year were included in the remand category.

(9) Saskatchewan - The average number of offenders temporarily out of custody increased in 1983-84 due to two new early release programs: the Work Incentive Program and the Conditional Release Program.

Data for 1982-83 include inmates held in or admitted to two community correctional centres in Northern Saskatchewan which were previously excluded from the data. It is estimated that during the 1982-83 these facilities housed a combined average of 23 inmates.

The lock-up function is police responsibility in Saskatchewan and no lock-up inmates are held in provincial facilities.

Admissions to community training residences are excluded from the admissions data but are included in the average count.

(10) Alberta - Prior to 1982-83 the provincial government was responsible for lock-ups in the Calgary and Edmonton areas. To calculate average count, 260 time points are used.

(11) British Columbia - Lock-ups in British Columbia are the exclusive responsibility of the police and are not housed in provincial facilities.

Average count data are based on 365 time points.

(12) Yukon - Lock-ups are not housed in the territorial facility in the Yukon; they are the exclusive responsibility of RCMP.

All admission types include transfers in each of the five years under examination.

(13) Northwest Territories - For the last four years, average counts were derived by dividing total inmate days served by 365. In 1981-82 the average count was calculated based on 12 time points (i.e. month-end counts). The on-register count for 1983-84 was estimated based on the proportion of inmates temporarily not in custody during 1982-83. The on-register count for 1984-85 was estimated to be the same as for 1983-84.

Lock-ups are the RCMP's responsibility and are not housed in the territorial facilities.

Table 23.18

(1) Unless otherwise specified, multiple offences are reported by most serious offences.

(2) Fine default admissions are not independent of the other offence categories in this table.

(3) Nova Scotia - Data for offence break-down were not available for 1983-84.

(4) New Brunswick - Offence data are based only on those offenders who were admitted and released during the calendar year.

(5) Quebec - Data for offence breakdown were based on multiple charges in 1984-85. A refinement in provincial offence reporting resulted in all provincial Statutes being reported under Other Provincial Statutes.

Persons charged with dangerous driving and driving without a permit are included under drinking/driving.

The large percentage value reported under fine default admissions is due to inmates sentenced under federal statutes. They are excluded from summary convictions and therefore not admissible to compensatory work program.

In 1983-84, the percentage calculations were based on 25,138 admissions. The difference between this figure and the number of sentenced admissions reported in the table is attributable to the way the data were processed.

(6) Manitoba - Offence data exclude sentenced admissions to the Provincial Remand Centre.

(7) Alberta - The most serious offence system of reporting is based on charges receiving a custodial disposition.

(8) British Columbia - Offence data are based on the most serious disposition.

(9) Yukon - Offence data are based on multiple charges, therefore, there will be double counting of some inmates.

(10) Northwest Territories - The offence data reported for the last two years are based on multiple charges resulting in some double counting of inmates. In 1983-84, the number of fine default admissions and drinking/driving offences represent calendar year data. There were 69 sentenced admissions that could not be distributed by offence category.

Table 23.19

(1) The median sentence length calculation excludes sentences of two years or more. The percent calculations are based on those admissions for which the length of sentence is know.

(2) Newfoundland and Labrador - In 1983-84, the sentence length categories reported were as follows: 1-15 days, 16 days, 1 month, 1-2 months, 3-4 months, 5-6 months, 7-9 months, 10-12 months, 13-18 months, 19-24 months, over 24 months, and parole supervisions.

(3) Nova Scotia - Sentence length categories reported in 1983-84 were as follows: less than 10 days, 11-30 days, 31-90 days, 4-6 months, 7-12 months, 13-18 months, 19-24 months less a day, and 2 years and over; in 1984-85 and 1985-86 the categories were: less than 10 days, 11-31 days, 32-92 days, 93-184 days, 185-366 days, 367-729 days and 730 days and over.

The median sentence length calculation for the first two years excluded fine defaulters which tended to inflate this figure. As well, percentage calculations for those same years excluded persons serving sentences for default of fine payment.

(4) New Brunswick - Sentence length data are based only on those offenders who were admitted and released during the calendar year. This could introduce some bias towards shorter sentences in the data.

(5) Quebec - Sentence length categories provided were as follows: 1 day, 2-5 days, 6-10 days, 11-15 days, 16-20 days, 21-30 days, 31-40 days, 41-50 days, 51-60 days, 61-70 days, 71-80 days, 81-90 days, 3 months and less than 4, 4 months and less than 6, 6 months and less than 12, 12 months and less than 18, 18 months and less than 24, 24 months and over.

(6) Ontario - The number of intermittent sentences for the last two years is not available. The number reported in 1983-84 may represent some double counting as parts of the term were served in different locations.

(7) Manitoba - Sentence length data exclude sentenced admissions to the Provincial Remand Centre. The categories provided prior to 1985-86 were as follows: 1-7 days, 8-14 days, 15-30 days, 31-90 days, 91-180 days, 181-365 days, 366-729 days, and two years or more.

(8) British Columbia - The aggregate sentence length on admission for all years was reported as follows: 1-7 days, 8-14 days, 15-21 days, 22-30 days, 31-45 days, 46-60 days, 61-90 days, 91-180 days, 180-270 days, 271-365 days, 366-729 days, and 730 days and over.

Table 23.20

(1) Nova Scotia - The age categories reported were: 16-17, 18-20, 21-24, 25-30, 31-40, 41-50, and over 50.

(2) Quebec - The age distribution was reported differently at the lower levels than those indicated on the table. They are: 16,17, 18, 19, and 20-24.

(3) Ontario - The age categories reported are: 16, 17, 18, 19-20, 21-22, 23-25, 26-30, 31-35, 36-40, 41-50 and 51 and over.

(4) British Columbia - The age distribution was reported differently at the lower levels than those indicated on the table. They are: under 18, 18-19, 20-21, and 22-24.

Table 23.21

(1) New Brunswick - Release data are based on the 1985 calendar year.

(2) Ontario - Time served categories reported were slightly different, they were: 1-7 days, 8-15 days, 16-29 days, 30-89 days, >3 - <6 months, >6 - <12 months, >12 - <24 months.

(3) Manitoba - Time served categories reported for the Provincial Remand Centre were slightly different than those on the table. They were as follows: 15-30 days, 31-90 days, 91-180 days, 181-365 days, and 366-729 days.

(4) British Columbia - Time served categories reported were slightly differently than those on the table, they were: 1-5 days, 6-15 days, 16-30 days, 31-60 days, 61-180 days, 181-365 days, and 366-729 days.

Table 23.24

(1) For method of estimation or jurisdictional anomalies the number of probation admissions for the first two years reported were estimated by applying the admission-to-count ratio for 1982-83 to the respective average counts for those years.

(2) If data on sex, ethnicity or age were not available for all five years, the most recent year's figures were applied to the total number of probation admissions for the years data that were not available. In effect, a weighted average was calculated to obtain national averages for all five years. In addition, unknown or missing cases were excluded from the data.

(3) New Brunswick - The 1982-83 data on females and age were derived from a sample survey of 450 cases taken in August, 1983. Since 1983-84, data on probation cases have been collected annually.

(4) Manitoba - Prior to 1985-86, probation admission characteristics by age and ethnicity are based on calendar year reports.

For 1982-83, offender characteristics were based on cases reported between January and June 1983, by a new automated system.

(5) Alberta - Probation admission characteristics in 1983-84 were based on the proportions found between September 1983 and March 1984.

(6) British Columbia - In 1982-83 offender characteristics for probation admissions also included offenders on provincial parole.

GLOSSARY (LEGAL AID SECTION)

The definitions of legal aid core data elements are presented below. Note that certain data reported in the tables are inconsistent with the following national definitions. In particular, varying counting units are used by the plans to capture caseload information. National definitions which apply to more than one table are not repeated. Also, the following list contains data elements which are referred to in the explanatory notes.

A. General Definitions

Scope - information reported describes the legal aid services delivered by legal aid offices (including community law clinics) which are funded in whole or in part by the legal aid plan of the province.

Legal aid office - refers to any establishment providing direct legal service which is funded in whole or in part by the legal aid plan. All offices report to or are administered centrally by the plan, i.e., community clinics are included. It is recognized that external agencies other than community clinics may receive grants from the plan to provide services which from the plan to provide services which could be termed legal aid, i.e., student legal aid clinics. Services provided through these agencies are generally excluded from the scope of the program for data collection purposes, except insofar as funding of external agencies is reported as an expenditure of the plan.

Legal aid plan - refers to a commission, agency or organization established in a province or territory either by law, regulation or agreement for the purpose of providing legal counsel to indigent persons for criminal, civil, family and administrative tribunal matters; or special services such as duty counsel, legal advice and assistance, mental health patient programs, public legal education, preventive law programs, referral, general information services and advice which is ancillary to a request for legal assistance.

Service delivery systems - refers to the method used to deliver legal aid services. These systems deliver legal aid services. These systems differ in the extent to which they rely on lawyers in private practice to provide services.

Judicare systems operate in New Brunswick, Alberta, and the two territories: services are delivered on a fee-for-service basis through private law firms.

Prince Edward Island, Nova Scotia and Saskatchewan operate staff systems in which professionals are employed directly by the plan. Under certain conditions, e.g., choice of counsel, professional conflict, seriousness of the crime or urgency of legal matter, legal aid staff are empowered to retain counsel from private firms.

The remaining provinces: Newfoundland, Quebec, Ontario, Manitoba and British Columbia, operate combined delivery systems. That is, services are provided by both staff and professionals in private practice. The Ontario plan is often referred to as a judicare plan; however, staffed offices are used to deliver services throughout the province. For this reason, the Ontario plan is considered to have a combined delivery system.

Fiscal year - begins April 1st and ends March 31st.

Criminal matters - includes matters under federal statutes and provincial/territorial statutes and municipal by-laws.

Civil matters - includes family and other civil law matters, e.g., administrative law, civil litigation.

B. Resource and Expenditure Data

Table 23.25 - Revenue by Source

Revenue - refers to all monies received directly by the legal aid plan during the fiscal year. Accounts receivable are excluded.

Government contributions - refer to monies received by the plans through an annual provincial government grant. The provincial government then claims reimbursement from the federal government for its portion of legal aid expenditures.

Client contributions - refer to all monies received from the aided person.

Cost recoveries - refer to the party cost ordered or agreed to be recovered in the case. Includes monies recovered from a judgement, award or settlement.

Lawyers´ trust account interest - refers to all monies received from the law profession.

Table 23.26 - Net Provincial Contribution to Total Legal Aid Expenditur

Net provincial contribution refers to monies contribution by the provinces. Provincial contributions are calculated to equal total expenditure less the sum of federal contributions to criminal and civil legal aid, direct deferral grants and revenues other than provincial government grants. Funds paid by the federal government through the Canada Assistance Plan (CAP) program for the cost-sharing of civil legal aid are subtracted for five provinces: Nova Scotia, Quebec, Ontario, Manitoba and British Columbia. Due to the change from lag year to current year payments in all jurisdictions except the Yukon Territory and the Northwest Territories, no federal government contributions were paid for the 1982-83 expenditure year. This is reflected in the new cost of legal aid to the provinces 1982-83.

Note that the net provincial contribution figures are based on data contained in Tables 23.25, 23.27 and 23.28. All table notes therefore apply to Table 23.26.

Gross National Expenditures (GNE) is used to deflate current dollar expenditures. That is, to control for inflation, the indexed changes in year-to-year government expenditures for goods and services as reported in the Implicit Price Index of Gross National Expenditure (GNE) have been used to calculate constant dollar figures. This index has been adjusted to represent change on a fiscal year bases (April to March). The index equals 100 for 1984-85.

Population refers to October 1st quarterly intercensal estimates released in Statistics Canada's Population, Catalogue No. 91-001. The 1981 and 1982 data are final postcensal estimates while the 1983 and 1984 data are updated postcensal estimates.

Table 23.27 - Federal Contribution to Criminal Legal Aid

Federal contribution refers to monies contributed by the Federal Department of Justice. Figures for 1982-83 are not reported for the provinces because of a "lag-year effect" built into the most recent federal-provincial criminal legal aid cost-sharing agreement. The figures for 1984-85 represent total monies contribution under the terms of the adult criminal and young offenders legal aid cost-sharing agreements. The figures for 1976-77 and later include contributions to shareable administrative costs.

Net cost-shared expenditure represents the claims by the provinces for cost incurred by each legal aid plan on matters specified under the federal-provincial cost-sharing agreements for criminal legal aid. It covers both legal service costs and associated administrative expenses. Such an amount is net of all contributions and recoveries received from clients. Net cost-shared expenditures are calculated in a province-by-province bases, therefore caution must be exercised when making inter-provincial comparisons.

Gross National Expenditures (GNE) - see Table 23.26 definitions.

Population - see Table 23.26 definitions.

Table 23.29 - Expenditure by Object

Direct legal service expenditure includes monies spent on the provision of legal advice and representation services to special target groups and other clients. All law office and contracted community clinic expenses are included, i.e., staff salaries, benefits, and overhead expenses. Central administrative expenses of the plan are excluded.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

Other program expenditure includes monies spent on legal research activities, public legal education, and grants to other agencies.

Legal research expenditure refers to monies expended by the plan for legal research activity. Excluded the cost of maintaining libraries.

Public education expenditure refers to monies expended by the plan on preventative law programs, educational programs, and publicity.

External project expenditure refers to monies expended by the plan on projects undertaken external to the plan. Note that funding of community clinics is not included.

Central administrative expenditure includes monies spent on head office functions and on offices that do not employ staff to advise and represent clients.

Table 23.30 - Direct Legal Service Expenditure by Type of Matter

Direct legal service expenditure is the sum of payments made to private law firms and the costs of legal service delivery by plan staff. See Table 3.5 data element definitions.

Private lawyer expenditure refers to fees and disbursements, together with other specific costs associated with individual cases, e.g., travel expenses, that are paid to private lawyers for the provision of legal services to legal aid client.

Staff professional expenditure refers to monies spent on the provision for legal advice and representation services by plan staff. These expenditures include, for example, legal disbursements, professional and support staff salaries and benefits, and overhead costs of direct legal service offices. Excluded are central administrative expenses of the plan.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

C. Personnel Data

Table 23.31 - Personnel Resources as of March 31st

Direct legal service staff refers to persons whose primary functions are to delivery legal advice and/or legal representation directly to clients.

Other staff refers to persons whose primary functions do not involve provision of legal advice and/or representation directly to clients. For example, lawyers, accountants, librarians, research staff, law students, and clerical staff.

D. Caseload Data

Table 23.32 - Total Applications by Type of Legal Matter

Application refers to a formal request evidenced in writing whereby a person applies to a legal aid office for assistance. When aggregated, the total number of applications reflect the number of individual requests for service rather than the total number of persons seeking assistance Requests for assistance are recorded on the intake document used by the legal aid office. Related legal matters enumerated at the time of contact with the office are included on one application, regardless of the requirement for a court appearance. If a matter related to that on the original application arises at a later data (other than appeal), a new application is not filed. Separate applications are counted for criminal and civil matters.

Total Number of applications reported for the fiscal year include all applications filed during that time, irrespective of when the application was approved or rejected. The count excludes duty counsel services.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

Summary service refers to the provision of advice, information, or any other type of minimal service to an individual during a formal interview. It can include simple legal tasks such as making a telephone call or drafting a letter on behalf of a client. They do not include inquiries at the "front desk" of the legal aid office, or telephone inquiries.

Summary assistance may be provided following the rejection of a formal written request. Only summary services provided to the client in person are included in the summary service count.

This count measures the number of units of service provided rather than the number of persons assisted, and is mutually exclusive of both the approved application and duty counsel counts.

Table 23.33 - Approved Applications by Type of Matter

Approval of a legal aid application is signified through the issuance of a certificate, referral, or any other authorization which denotes that legal service will be granted to the applicant. This count is mutually exclusive of both the summary service and duty counsel counts.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

Population - see Table 23.26 definitions.

Table 23.34 - Refused Applications by Type of Matter

Refused application refers to an application that has been denied. An application can be refused, appealed and still refused. The initial refusal only is counted.

Financial ineligibility refers to a refusal for legal aid based on some financial information disclosed by the applicant pertaining to his/her assets and liabilities. If one application involves two reasons for refusal, financial ineligibility is counted as the major reason.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

Table 23.35 - Appeal Dossiers Completed by Type of Matter

Appeal refers to an appeal of a lower court decision, not an appeal of a refused application.

Criminal Matters - see general definitions, Section A.

Civil Matters - see general definitions, Section A.

E. Client Profile Data

Age and sex characteristics of criminal and civil legal aid applicants and clients are based on three counts: total applications, approved applications, and refused applications. Age at the time of application is reported.

In April, 1984, the procedural aspects of the Young Offenders Act replaced the Juvenile Delinquents Act. The uniform age provisions, which set the age for young offenders at between 12 and 18, were implemented in April, 1985. Prior to the implementation of the uniform age provisions, the cut-off age was less than 17 in Newfoundland and British Columbia, less than 16 in the remaining provinces and territories, Quebec and Manitoba excepted. The last two provinces had already established a maximum limit of less than 18.

FOOTNOTES: (LEGAL AID SECTION)

Columns may not add to indicated totals due to rounding. Calculations are also subject to rounding error.

Table 23.25

(1) Refers to monies received by the plans through an annual provincial government grant. The provincial government then claims reimbursement from the federal government for its portion of legal aid expenditures.

(2) A change from calendar year to fiscal year reporting caused 1973-74 to be a 15-month reporting period (January 1973 to March 1974).

(3) The 1973-74 fiscal year represents the plan's initial six-month operating period. Revenue is estimated to equal expenditure for each fiscal year given that expenditures are fully funded by the government of Prince Edward Island. Coverage was extended to family matters during 1980-81.

4) A cash-based accounting system was used through fiscal year 1979-80. Data reported for 1980-81 through to 1984-85 are based on accrual accounting procedures. "Client Contributions and Cost Recoveries" are included in the "Other" category for the years 1972-73 through to 1980-81. The provincial government grant for 1976-77 includes $133,501 in special funding by the government of Nova Scotia for choice of counsel payments.

(5) The plan's initial period of operation was from September 1, 1971 to March 31, 1972. Civil coverage was initiated during the fiscal year 1981-82 and accounts largely for substantial increases in revenue and expenditures for that and the following fiscal years.

(6) The plan's initial period of operation was from September 5, 1972 to March 31, 1973.

(7) The plan's initial period of operation was from September 1972 to March 1973. "Government Contributions" for 1972-73 to 1981-82 include lawyers' trust account interest. "Client Contributions and Cost Recoveries" for the years 1973-74 through to 1980-81 include Department of Health and Social Development funding for civil legal aid expenditure. Also, user fees of $35.00 were in effect from April 1, 1979 to May 1, 1982. "Other revenue includes interest from term deposits fro the years 1972-73 to 1974-75 and funding from the University of Manitoba for its law centre for the year 1978-79.

(8) The plan's initial period of operation was from August 20, 1974 to March 31, 1975. "Client Contributions and Cost Recoveries" include $26,000 refunds in both 1983-84 and 1984-85 to the Commission of unexpended prior year collections. These refunds result from changes in governing legislation. "Other" revenue includes "Client Contributions and Cost Recoveries" for the years 1976-77 to 1980-81.

(9) Figures from October 1975 to September 1979 are aggregates of the financial statements of the Legal Services Commission and the Legal Aid Society. "Other" revenue generally includes interest and publication sales income. Revenue reported for 1982-83 through to 1984-85 is based on an accrual system of accounting.

(10) Revenue is estimated to equal expenditure for each fiscal year given that expenditures are fully funded by the government of the Northwest Territories. "Government Contributions" include funding of the Native Courtworkers Program for 1981-82 through to 1984-85 in the amounts of $341,000, $443,000, $413,000 and $495,000 respectively.

(11) "Client Contributions and Cost Recoveries" are reported separately, although they are received by the Plan as part of government revenue. Revenue is estimated to equal expenditure for each fiscal year, given that expenditures are fully funded by the government of The Yukon Territory.

Table 23.26

Note that the net provincial contribution figures are based on data contained in Tables 23.25, 23.27 and 23.28. All table notes therefore apply table 23.26

(1) Refers to monies contributed by the provinces. Provincial contributions are calculated to equal total expenditure less the sum of federal contributions to criminal and civil legal aid, direct federal grants and revenue other than provincial government grants. Funds paid as of January 1986, by the federal government through the Canada Assistance Plan (CAP) program for the cost-sharing of civil legal aid are subtracted for five provinces; Nova Scotia, Quebec, Ontario, Manitoba and British Columbia. Provincial contribution figures for 1982-83 include monies yet to be reimbursed by the Federal Department of Justice for the cost-sharing of criminal legal aid. Due to the change from lag year payments to current year payments in all jurisdictions except the Yukon Territory and the Northwest Territories, no federal government contributions were paid for the 1982-83 expenditure year.

(2) To control for inflation, the indexed changes in year-to-year government expenditure for goods and services as reported in the Implicit Price Index of Gross National Expenditure (GNE) have been used to calculate constant dollar figures. This index has been adjusted to represent change on a fiscal year basis (April to March). The index equals 100 for 1984-85.

(3) Per capita figures are based on October 1st quarterly intercensal estimates released in Statistics Canada's Population, Catalogue No. 91-001. The 1981 and 1982 data are final postcensal estimates while the 1983 and 1984 data are updated postcensal estimates.

(4) Considered in the calculations are federal grants of $4,227, $7,217, $9,000, $11,657, $7,000 and $10,000 for the fiscal years 1978-79 through to 1984-85 respectively, excluding 1980-81.

(5) Estimate.

(6) Considered in the calculation for 1980-81 is a federal Department of Justice grant of $25,592 for the initiation of a family legal aid program.

(7) Considered in the calculation are federal contributions to civil legal aid of $119,971, $370,716, $514,700, $607,100, $443,900 for, November of 1977 to the end of fiscal 1978-79 and for each subsequent fiscal expenditure year to 1984-85, respectively, excluding 1982-83 and 1983-84.

Considered in the calculations are federal grants of $6,991, $5,000, $15,235, $120,451 and $28,772 for the fiscal years 1978-79, 1979-80, 1980-81, 1981-82 and 1983-84 respectively. The last three grants were contributed by the Federal Department of Justice.

(8) Considered in the calculations are federal contributions to civil legal aid estimated at $5.0 million each expenditure year for 1980-81 through to 1982-83. Similar contributions for the expenditure years 1983-84 and 1984-85 are $12,594,853 and $16,406,788 respectively. Considered in the calculations are federal grants of $20,000, $25,700 and $4,000 for the fiscal years 1972-73, 1975-76 and 1976-77 respectively.

(9) Considered in the calculations is a federal contribution to civil legal aid estimated at $2.0 million for 1980-81. Similar contributions for the expenditure years 1981-82 through to 1984-85 are $53,452, $4,491,360, $3,763,485 and $53,452, $4,491,360, $3,763,485, and $5,094,728 respectively.

(10) Considered in the calculations are federal contributions to civil legal aid of $175,000, $316,982, $423,840, $438,268 and $1,051,469 for the expenditure years 1980-81 (seven months), through to 1984-85 respectively.

Considered in the calculations are Federal Department of Justice grants of $64,000 and $75,000 for the fiscal years 1983-84 and 1984-85. These grants provided support for the plan's Public Interest Law Department.

(11) Considered in the calculations are federal contributions to civil legal aid of $141,000, $438,000 and $729,000 for the expenditure years 1978-79, 1979-80 and 1980-81 respectively. The following funding was considered in calculating net provincial contributions: Native Courtworkers and Counselling Association grants from the Government of Canada in the amounts of $400,000, $350,000, $423,779, $524,306, $654,671 and $520,006 for the fiscal years 1976-77 through 1981-82; Federal work project grants in the amounts of $15,515, $13,091 and $26,094 for the fiscal years 1977-78, 1978-79, and 1979-80 respectively; and Federal Department of Justice funding for the Burnaby Public Defenders project in the amount of $60,990 for fiscal year 1978-79.

(12) Considered in the calculations are federal contributions to the Courtworkers' program in the amounts of $170,000, $221,000, $206,000 and $247,000 for the fiscal years 1981-82 through to 1984-85.

Table 23.27

(1) Refers to monies contributed by the Federal Department of Justice. Figures for 1982-83 are not reported for the provinces because of a "lag-year effect" built into the most recent federal-provincial criminal legal aid cost-sharing agreement. The figures for 1984-85 represent total monies contributed under the terms of the adult criminal and young offenders legal aid cost-sharing agreements. The figures for 1976-77 and later include contributions to shareable administrative costs.

(2) Net cost-shared expenditure represents the claims by the provinces for costs incurred by each legal aid plan on matters specified by the federal-provincial cost-sharing agreements for criminal legal aid. It covers both legal service costs and associated administrative expenses. Such an amount is net of all contributions and recoveries received from clients. Net cost-shared expenditures are calculated on a province-by-province basis, therefore caution must be exercised when making interprovincial comparisons.

(3) To control for inflation, the indexed changes in year-to-year government expenditure for goods and services as reported in the Implicit Price Index of Gross National Expenditure (GNE) have been used to calculate constant dollar figures. This index has been adjusted to represent change on a fiscal year basis (April to March). The index equals 100 for 1984-85.

(4) Per capita figures are based on October 1st quarterly intercensal estimates released in Statistics Canada's Population, Catalogue No. 91-001. The 1981 and 1982 data are final postcensal estimates while the 1983 and 1984 data are updated postcensal estimates.

(5) Included are retroactively paid differential payments of $18,237 for fiscal year 1979-80 and $150,828 for fiscal year 1981-82.

(6) Estimate.

(7) Included are retroactively paid differential payments of $3,311 for fiscal year 1980-81 and $18,194 for fiscal year 1981-82. A federal grant of $25,592 for coverage of family matters is excluded from 1980-81.

(8) Included are retroactively paid differential payments of $7,947 for fiscal 1979-80 and $64,943 for fiscal 1981-82.

(9) Funding for Saskatchewan began in April 1974.

(10) Included is the cost-shared funding of civil legal aid. Funding for the Northwest Territories began in mid-August 1971 and amounted to $43,000 and $86,000 for 1971-72 and 1972-73 respectively. Cost-sharing of administrative services began in 1978-79.

(11) Included are retroactively paid differential payments of $12,024 for 1978-79, $17,889 for 1979-80 and $49,251 for 1980-81. Figures for the Yukon Territory include cost-shared funding of civil legal aid. Due to a change in the cost-sharing agreement, payments for the 1982-83 expenditure year were made to the Yukon Territory and the Northwest Territories only.

Table 23.28

(1) To control for inflation, the indexed changes in year-to-year government expenditure for goods and services as reported in the Implicit Price Index of Gross National Expenditure (GNE) have been used to calculate constant dollar figures. This index has been adjusted to represent change on a fiscal year basis (April to March). The index equals 100 for 1984-85.

(2) Per capita figures are based on October 1st quarterly intercensal estimates released in Statistics Canada's Population, Catalogue No. 91-001. The 1981 and 1982 data are final postcensal estimates while 1983 and 1984 data are updated postcensal estimates.

(3) A change from calendar year to fiscal year reporting caused 1973-74 to be a 15-month period (January 1973- to March 1974).

(4) The 1973-74 fiscal year represents the plan's initial six-month operating period. Coverage was extended to family matters during 1980-81.

(5) A cash-based accounting system was used up to and including the fiscal year 1979-80. The change to an accrual system facilitated the inclusion of accrued private solicitor fees.

(6) The plan's initial period of operation was from September 1, 1971 to March 31, 1972.

(7) The plan's initial period of operation was from September 5, 1972 to March 31, 1973.

(8) Includes Student Legal Aid Society funding for the fiscal years 1971-72 to 1984-85, and Independent Community Clinic funding for the fiscal years 1975-76 to 1984-85.

(9) The plan's initial period of operation was from September 1972 to March 1973.

(10) The plan's initial period of operation was from August 20, 1974 to March 31, 1975. Value for free services (i.e. rent) is included in the figures.

(11) Figures from October 1975 to September 1979 are aggregates of the financial statements of the Legal Services Commission and the Legal Aid Society. The figures reported from 1982-83 through to 1984-85 are based on an accrual system of accounting. Commencing in 1982-83, the Native Courtworker and Counselling Association was directly funded by the Ministry of the Attorney General, rather than by the Plan.

(12) Office space and financial administration services provided by the territorial government are not included. Included are monies for the funding of the Native Courtworkers Program in the amounts of $341,000, $443,000, $413,000 and $495,000 for the fiscal years 1981-82 through to 1984-85.

(13) Services, supplies and accommodation provided by the territorial government are not included.

Table 23.29

(1) "Direct legal service expenditure" includes monies spent on the provision of legal advice and representation services to special target groups and other clients. All law office and contracted community clinic expenses are included (i.e., staff salaries, benefits, and overhead expenses). Also included are private lawyer fees and disbursements. Central administrative expenses of the plan are excluded.

(2) "Other program expenditure" includes monies spent on legal research activities, public legal education, and grants to other agencies.

(3) "Central administrative expenditure" includes monies spent on head office functions and on offices that do not employ staff to advise and represent clients.

(4) Expenditures on provincial statute offences are included in the civil category rather than in the criminal category.

(5) The plan does not pay for all central administrative functions, as some financial services are provided by the provincial government free of charge. Law office overhead expenditures have been included in the central administration category.

(6) Accrual rather than cash-based expenditures are reported. Central administrative expenditures in the first two years include overhead expenses of law offices. In the latter two years all law office expenses are properly classified under the direct legal service expense category. Expenditures on provincial statute offences are included in the civil category rather than in the criminal category fro 1983-84 and 1984-85.

(7) Civil legal aid coverage commenced in October 1981. Expenditures on provincial statute offences have comprised approximately 8% of criminal matter expenditures over the four year period.

(8) Costs incurred by the Ontario Ministry of Community and Social Services on financial assessment officers are not included. In 1983-84, these services cost the Ministry approximately $1,076,903. Expenditures on provincial statute offences have comprised approximately 1% of criminal matter expenditures since 1983-84. Community clinic grants were $5,469,935, $6,795,142, $8,298,266 and $9,840.000 for the expenditure years 1981-82 through to 1984-85 respectively.

(9) In 1983-84 and 1984-85, staff expenditures on provincial statute offences are included in the civil category rather than in the criminal category.

(10) The plan does not pay for office space which is provided free of charge by the provincial government.

(11) Expenditures on provincial statute offences have comprised less than 1% of criminal matter expenditures over the four year period.

(12) Accrual rather than cash-based expenditures are reported in 1982-83, 1983-84, and 1984-85. The plan does not pay rent for head office space. It is provided free of charge by the provincial government. Since 1982-83 the Native Courtworker and Counselling Association has been funded directly by the Ministry of Attorney General rather than by the Plan. Grants to community clinics amounted to $2,304,615, $1,919,644, and $1,776,653 for the expenditure years 1982-83 through to 1984-85 respectively.

(13) Estimate.

(14) "Other program expenditure" includes monies spent on the Native Courtworkers Program and the Keewatin Courtworker Program. "Central administrative expenditure" exclude the cost of office space and financial services that are provided free of charge by the territorial Circuit court travel expenses have comprised an average of 13% of direct legal service expenditures over the four-year period.

(15) "Central administrative expenditure" excludes the cost of office space and financial services that are provided free of charge by the territorial government. Circuit court travel expenses have comprised an average of 3% of direct legal service expenditures over the four year period. Expenditures on territorial offences have comprised less than 1% of criminal matter expenditures over the four-year period.

Table 23.30

See explanatory notes for Table 23.29

(1) Excluded from the private lawyer expenditures are the costs of nine family cases in 1981-82, four family cases in 1982-83, and seven family cases the following year.

(2) Estimate.

Table 23.31

(1) "Direct legal service staff" refers to pensions whose primary functions are to deliver legal advice and/or legal representation directly to clients.

(2) "Other staff" refers to all persons whose primary functions do not involve the provisions of legal advice and/or representation directly to clients. For example, lawyers, accountants, librarians, research staff, law students, and clerical staff.

(3) The reduced number of staff in 1982-83 was a result of budget restraint and consequent staff layoff.

(4) Additional resources are provided by the Ministry of Community and Social Services. For example, in 1983-84, approximately 42 full-time equivalent staff provided financial assessment services to legal aid clients.

(5) A January 1st position count is reported. Community clinic staff are excluded from the 1982-83 count.

Table 23.32

(1) Most of the plans screen applicants to some degree before an application is filed. For this reason, the total application count does not always include those who are determined to be ineligible before they file an application. In only two provinces, Newfoundland and New Brunswick, are applications taken for all applicants.

(2) Provincial statute offence cases are included in the civil count rather than in the criminal count. Applications for summary services are included.

(3) Civil coverage commenced in October 1981. Applications for civil summary services are included.

(4) A small number of municipal offence cases are handled. These are included in the civil count.

(5) Community clinic data are excluded. These clinics supplement the civil legal aid services provided by private lawyers.

(6) Applications for summary services (non-certificate opinions) are included.

(7) Partial data for Victoria Community Law Office are excluded in 1981-82 and 1982-83.

(8) Refers to the number of persons applying for legal aid services. Duty Counsel counts are included.

(9) Applications for summary services, (consultation certificates) which deal with civil cases primarily, are included. Data respecting fiscal 1984-85 are not comparable to the figures reported in earlier years due to the introduction of a new management information system.

Table 23.33

(1) The population data are October 1st quarterly intercensal estimates released in Statistics Canada's Population, Catalogue No. 91-001. The 1981 and 1982 data are final postcensal estimates whereas the 1983 and 1984 data are updated postcensal estimates.

(2) Provincial offence matters are included in the civil rather than criminal count. Applications for summary services are included.

(3) The 1981-82 to 1983-84 data refer to completed dossier counts. The 1984-85 count includes summary services.

(4) Civil coverage commenced in October, 1981. Applications for civil summary services are included.

(5) Municipal offences are included in the civil count.

(6) Calendar year community clinic data are included, i.e., applications approved in calendar year 1981 are included in the 1981-82 fiscal year count. In 1981, 17,520 files were opened. The corresponding figures in the following three years are 21,671, 23,040, and 24,221 respectively. Community clinics assist clients in civil matters only.

(7) Duty counsel services are included. Provincial statute offences accounted for 791 of the criminal applications approved in 1983-84 and 347 in the following year. Family matters comprised 4,542 of the civil applications approved in 1983-84 and 4,249 in the following year. Data respecting fiscal 1984-85 are not comparable to the figures reported in earlier years due to the introduction of a new management information system.

(8) Applications for summary services (non-certificate opinions) are included.

(9) Partial data for the Victoria Community Law Office are excluded in 1981-82 and 1982-83. Family matters comprised 5,101 of the civil applications approved in 1983-84 and 7,561 in the following year.

(10) The counts refer to the number of persons assisted. Duty counsel counts are included.

(11) Applications for summary services (consultation certificates) are included. Data respecting fiscal 1984-85 are not comparable to the figures reported in earlier years due to the introduction of a new management information system.

Table 23.34

(1) Most of the plans screen applications to be filed. For this reason, the refuse-application count does not always include those who are denied services before they file an application. In only two provinces, Newfoundland and New Brunswick, are applications taken from all applicants.

(2) Provincial statute offence cases are included in the civil count rather than the criminal count. Application for summary services are included.

(3) Civil coverage commenced in October 1981. Applications for civil summary services are included.

(4) Applications for municipal offence cases are included in the civil count.

(5) Community clinic data are excluded. These clinics handle civil matters only.

(6) Refers to the number of pensions assisted.

(7) Data respecting fiscal 1984-85 are not comparable to the figures reported in earlier years due to the introduction of a new management information system.

Table 23.35

(1) Of the 35 civil appeals handled in 1983-84, 25 related to family matters. In the following year, 17 of the 35 civil appeals related to family matters.

(2) In 1981-82, 10 appeals were initiated by the Crown. The corresponding figure in 1982-83 was 14.

(3) The civil count excludes community clinic data. In 1981-82, 96 of the criminal appeals were initiated by the Crown. The corresponding figure in 1982-83 was 137.

(4) Data are based on opened rather than closed dossiers. In 1981-82, 24 of the criminal appeals were initiated by the Crown. The corresponding figure in 1982-83 was 34.

(5) In 1981-82, 67 of the criminal appeals were initiated by the Crown. The corresponding figure in 1982-83 was 120.

(6) Data respecting fiscal 1984-85 are not comparable to the figures reported in earlier years due to the introduction of a new management system.

NATIVE PEOPLES:

Notes:

Tables:

1-7 Native peoples data compiled from 1981 Census of Population have the following limitations.

(1) Counts represent a self-perceived and self-reported population, counts not based on a set of objective criteria or rigidly defined concept of native peoples.

(2) At the national level the counts of native people include, erroneously, approximately 5,000 persons of Indo-Pakistani or other origins.

(3) At the national level the counts of Status Indians exclude about 10,000 non-native women who are legally Status Indians but chose not to report themselves as such.

(4) At the national level at least 5,200 native people in institutions are excluded from the counts.

(5) In Newfoundland just over 1,000 Micmac Indians have reported themselves as Status Indians although they did not appear as such on Indian Registers.

(6) Because of problems of non-response or distorted response, data for the following reserves are inaccurate.
-Big Cove, N.B.
-Kanawake, Que.
-Constance Lake, Ont.
-Stoney, Alta.
-Peigan, Alta.
-Cowichan, B.C.

The smaller the reserve population the greater the possibility of distortion due to the effects of weighting and sampling.

8-17 Population refers to native peoples of both single and multiple origin.

25 see 8-17 above.

28-30 Income estimates will be affected by imputation for non-response. Estimates are in current 1981 dollars. Population refers to native peoples.

33 see 8-17 above.

35 These are sentenced admissions to provincial custody.
Newfoundland - data for NF includes Labrador

Manitoba - data does not include the Winnipeg Remand Centre

Alberta - of the 5,227 Native people admitted, 11% were non-registered Indians, 39% were Metis and 50% were registered Indians.

For further details with respect to the quality of native peoples data, readers are referred to the Sources mentioned below.

YOUTH:

Notes:

Tables:

3-6 Population refers to 15-24 years old.

11 Percentage of persons aged 15-24 who are not attending school full time and are not in the labour force as a percentage of the total population aged 15-24. Data are annual averages.

13-21 (...) estimates subject to a level of sampling error too high for publication. 1986 labour force rate & unemployment rate could have standard deviation rates from 5.1-10.%.

15-17 see 3-6 above.

22 For P.E.I. percentage based on population estimate too small to be reliable.

23 For P.E.I. high sampling variance, estimate should be used with caution.

24-27 Rates per 100,000 of population in the specified age group.

26-27 Crude suicide rates are given for each age group.

30 Manitoba youth only includes ages 15-22.
Sentenced & remand admissions are to provincial custody.

ELDERLY:

Notes:

Tables:

3-5 Population refers to 65 years & over.

10 See Source for definitions. Estimates are based on data in current 1981 dollars.

10-15 Data for Yukon and the NWT not available.

16 Institutional care in hospitals and mental health institutions. Estimated by applying the distribution of total days of stay of persons over 65 to the total number of patient days. 1982-83 data are used for the NWT.

All tables are dealing with elderly (65 +) whether males, females or both.
